Professional Experience

- **Freelancer React JS Developer**
3 years of experience working on various projects, using React & Next.
 - **Trainer - Software Testing**
Former trainer at Digital Orange Center in 2023
 - **Volunteer IT Member, Head of IT, Team Leader**
in Life Maker Organization (2024)
 - **Volunteer Data Entry**
Baranya Zakat Charity (2021)
-

Projects

- **A sales management system** mainly using React, MUI, and RTK Query for handling CRUD operations and API interactions. Implemented token-based authentication for secure access and integrated Excel export functionality. Enhanced user experience with smooth navigation using React Router and animations with Framer Motion.
 - **A personal portfolio website** built with Next.js, and Lottie React for interactive animations, featuring a contact form powered by Form spree, that allows form submissions to your email directly.
 - **A dynamic dashboard:** using MUI, Full Calendar library for displaying and managing events with customizable views, and Nivo library for data visualization, with a fully responsive design for better user experience across devices.
-
